OrthoCompass

Are you an orthopaedic surgeon looking to enhance your patient care? Let us introduce you to OrthoCompass, an innovative clinical platform designed to help you navigate evolving your practice with data.

» What makes OrthoCompass different?

OrthoCompass is not just another online patient outcomes collection tool, it has been designed from decades of experience in managing clinical orthopaedic data and understanding the pitfalls of current platforms available.

Identify patient groups

Moulded to match the spectrum of conditions encountered in clinical practice. Integrate outcomes into models of care, informed by the latest scientific evidence.

Benchmark outcomes

Use Interactive dashboards to contextualise individual outcomes within your practice. Make informed decisions for each patient at every stage of their journey.

Research-grade data

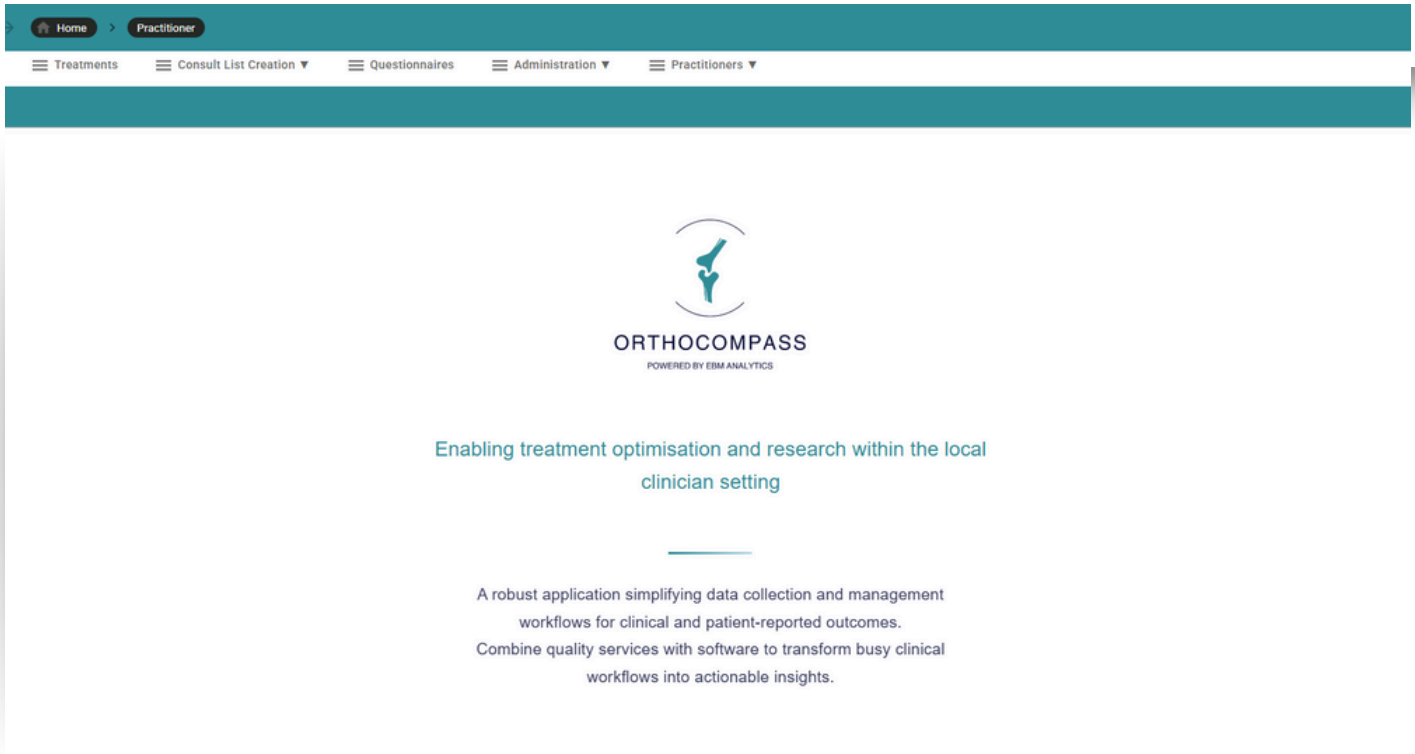

A system that targets the logistical challenges of capturing and organising detailed datasets for patients. Invest in research-grade data quality, with a platform that removes cost barriers and without the need for technical know-how.

ORTHOCOMPASS

» What can I expect from OrthoCompass?

KEY FEATURES

Unlock Insights: Gain real-time visibility into patient responses to treatments, and individual outcomes within the broader context of your practice, enabling you to make informed decisions.

Effortless Data Management: From patient consultation to post-surgery recovery, OrthoCompass offers streamlined data collection and interpretation tools and dashboards.

High Quality Data: OrthoCompass is built on pre-defined cohorts for pathologies of the upper limb, lower limb and pelvis, with patient-reported outcomes selected for set time points, based on the latest research.

Compliance Assurance: OrthoCompass uses industry-standard safeguards, ensuring data security and regulatory compliance across Australia.

KEY BENEFITS

Save time: Establishing systems to support evidence-based practice and value-based healthcare is both time-consuming and challenging. We take care of the heavy lifting that overburdens care teams and frustrates patients.

Stay in the know: Uncover evidence-based insights about patient-reported and clinically relevant outcomes, and position yourself to drive measurable changes that make an impact.

Deliver outstanding care: From the first clinic visit through to the last follow-up, we take care of the process so you can focus on your patients.
